

平成 16~17 年度 論文発表

1) Masuda, M., Saimaru, H., Takamura, N., Imai, K.

An improved method for proteomics studies in *C. elegans* by fluorogenic derivatization, HPLC isolation, enzymatic digestion and liquid chromatography-tandem mass spectrometric identification.

Biomed.Chromatogr., 19: 556-560 (2005)

2) Saimaru, H., Masuda, M., Toriumi, C., Santa, T., Ichikawa, E., Takamura, N., Imai, K.

A new fluorogenic reagent aimed at simultaneous determination of peptides or proteins in two different samples.

J. Mater. Chem., 15:2865-2872 (2005)

3) Sakai-Kato, K., Kato, M., Nakajima, T., Toyo'oka, T., Imai, K., Utsunomiya-Tate, N.

Cationic starch derivatives as dynamic coating additives for protein analysis in capillary electrophoresis.

J. Chromatography A, 1111: 127-132 (2006)

4) Sakai-Kato, K., Kato, M., Homma, H., Toyo'oka, T., Utsunomiya-Tate, N.

Creaction of a P450 Array toward High-throughput Analysis.

Anal. Chem., 77: 7080-7083 (2005)

5) Yasui, E., Wada, M., Takamura, N.

Novel approach to arylhydrazones, the precursor for Fischer indole synthesis, via diazo esters derived from α -amino acid esters

Tetrahedron Lett., 47: 743-746 (2006)

6) Noda, Y., Sumino, T., Fujisawa, T., Miyata, N., Kaiya, T., Kohda, K.

1-Amino-4-phenyl-1,2,3,6-tetrahydropyridine and 1-amino-4-phenylpyridinium salt, the 1-amino analogues of neurotoxins, MPTP and MPP+, induce apoptosis in PC12 cells: Detection of apoptotic cells by Comet assay and flow cytometric analysis.

In Vivo, 18: 561-570 (2004)

7) Taguchi, T., Kunieda, K., Takeda-Shitaka, M., Takaya, D., Kawano, N., Kimberley, M.R., Booker-Milburn, K., Stephenson, G.R., Umeyama, H., Ebizuka, Y., Ichinose, K.

Remarkably Different Structures and Reaction Mechanisms of Ketoreductases for the Opposite Stereochemical Control in the Biosynthesis of BIQ Antibiotics.

Bioorg. Med. Chem., 12: 5917-5927 (2004)

8) Booker-Milburn, K.I., Gillan, R., Kimberley, M., Taguchi, T., Ichinose, K., Stephenson, G.R., Ebizuka, Y., and Hopwood, D.A.
Enantioselective Reduction of β -Keto Acids with Engineered *Streptomyces coelicolor*.
Angew. Chem Int. Ed., 44: 1121-1125 (2005)

9) Li, A., Itoh, T., Taguchi, T., Xiang, T., Ebizuka, Y., Ichinose, K.
Functional Studies on a Ketoreductase Gene from *Streptomyces* sp. AM-7161 to Control the Stereochemistry in Medermycin
Biosynthesis.
Bioorg. Med Chem., 13: 6856-6863 (2005)

10) Nagata, M., Suzuki, W., Iizuka, S., Tabuchi, M., Maruyama, H., Takeda, S., Aburada, M., Miyamoto, K.
Type 2 diabetes mellitus obese mouse model induced by monosodium glutamate.
Exp. Anim., 55(2): 109-115 (2006)

11) Nishida, S., Kurokawa, K., Matsuo, M., Sakamoto, K., Ueno, K., Kita, K., Sekimizu, K.
Identification and Characterization of Amino Acid Residues Essential for the Active Site of UDPN-acetylenolpyruvylglucosamine
Reductase (MurB) from *Staphylococcus aureus*.
J. Biol. Chem., 281: 1714-1724 (2006)

12) Kawaguchi, M., Scott, K.A., Moran, T.H., Bi, S.
Dorsomedial hypothalamic corticotrophin-releasing factor (CRF) mediation of exercise-induced anorexia.
Am. J. Physiol. Regul. Integr. Comp. Physiol., 288: R1800-R1805 (2005)

13) Otani, M., Oka, T., Daly, J.W., Xiao, Y., Kellar, K.J.
Mouse Be-ta-TC6 insulinoma cells: high expression of functional $\alpha 3\beta 4$ nicotinic receptors mediating membrane potential, intracellular
calcium and insulin release.
Mol. Pharmacol., 69: 899-907 (2006)

14) Ito, A., Otsuka, M., Kawamura, H., Ikeuchi, M., Ohgushi, H., Sogo, Y., Ichinose, N.
Zinc-Containing Tricalcium Phosphate and Related Materials for Promoting Bone Formation.
Current Applied Physics, 5: 402-406 (2005)

15) Otsuka, M., Oshinbe, A., Ito, A., Otsuka, K., Higuchi, W. I., LeGeros, R. Z.
Therapeutic Effect of Selected Biomaterials (Mg/Z/F-CaPs, Administrated by Injection) on Bone Properties of Ovariectomized Rats.
Key Engineering Materials, 309-311: 243-246 (2006)

16) Otsuka, M., Otsuka, K.

Bone Regeneration by using Drug Delivery System Technology and Apatite Intelligent Materials.

Proceeding of International Symposium of Maxillofacial & Oral Regenerative Biology in Okayama 2005, J. Hard Tissue Biology, 14(2):
261-262 (2006)
